PROFILE INFO

Driven by passion for technology and innovation, I strive to enhance my skills and contribute to impactful projects. With a strong foundation in computer science and practical experience in HTML, CSS, and C, I am constantly seeking opportunities to grow and solve challenging problems. I believe in the power of learning and adapting to new environments, always pushing myself to deliver high-quality work. My goal is to collaborate with like-minded individuals and contribute to real-world projects that can make a difference.

PROJECT

■ Simple GPS Tracking System

Developed a GPS tracking system that accurately locates the user's exact position, utilizing real-time location data. Built the application using Kotlin in Android Studio, focusing on efficient performance and seamless user experience in an Android environment.

■ Inventory management

Designed an intuitive inventory management system using PyMongo, HTML, and CSS to simplify stock tracking and streamline operations. With a clean, user-friendly interface, the system ensures easy management of inventory data, helping users stay organized and in control of their stock at all times.

EXPERIANCE

Freelancing

(Aug 2024 – Present)

- Designed and developed a website using WordPress
- Fixed broken links and other web page issues that improved the user experience
- Edited existing web pages to ensure accuracy and optimize content for SEO purposes.
